EKATO today offers state-of-the-art mixing technology for all process-oriented industries such as chemicals, plastics, pharmaceuticals, biotechnology, paints and coatings, flue gas desulfurization, hydrometallurgy, cosmetics and foods. The privately owned company develops and produces large-scale agitators for demanding mixing processes, modular industrial agitators as well as equipment for mixing, homogenizing and drying solid and semi-solid products. The product range also includes high-quality mechanical seals and supply systems. More than 25 patents and 31 trademarks speak for the innovation capacity EKATO. Over 500 confidentiality agreements stand for customer-oriented technical solutions. EKATO invests 7% of sales in new and further developments at its research and development centers at its headquarters and in the USA.

The comprehensive services include the installation and commissioning of EKATO agitators and a computerized spare parts and maintenance management – implemented by its own technicians if requested. In addition, the revamping of agitators is performed in order to optimize mechanical and process technology to save energy and thus achieve greater process efficiency. The internationalization of operations began immediately after the Second World War, when EKATO developed its own agitator seals for Swiss chemical companies. The first international subsidiary commenced operations in France in 1974. Meanwhile, the company is represented worldwide with subsidiaries in Australia, Brazil, Chile, China, Britain, India, Japan, the Netherlands, Russia, Singapore, South Africa and the USA as well as a network of representatives. Accordingly, the export ratio is over 80%. EKATO is regularly represented at German and international fairs.

The group employs 650 people with an annual turnover of approx. 160 million Euros. The family enterprise is managed by Dr.-Ing. Erich Kurt Todtenhaupt as CEO and two other family members. It is structured as a holding company with three OEMs for the business units (EKATO RMT, EKATO FLUID and EKATO SYSTEMS).
